The mission of the National Maritime Intelligence Center (NMIC) staff is to protect the United States from hostile and illegal threats in or emanating from the Maritime Domain, by ensuring that the best possible intelligence is integrated into national policy and operational decisions. The staff is located at the National Maritime Intelligence Center Facility, Suitland Federal Center in Suitland, MD.

The Director of the National Maritime Intelligence Center is the principal advisor to the Director of National Intelligence on maritime intelligence. As the unified maritime voice of the Intelligence Community, NMIC also provides direct support to the National Security Staff and its related Interagency Policy Committees.

The NMIC is a critical ISE mission partner. Its whole of government maritime solution leverages domestic and global partnerships to close analytic and collection gaps to create government-wide unity of effort as a single integrated team. Please visit these websites to learn more about their information sharing efforts.
